The Theology of the Atlas KINS Institute (AKI)

An Updated Overview

Our Calling

The Atlas KINS Institute (AKI) is a Christian research ministry devoted to exploring mathematics, science, and the created order in the light of Holy Scripture. We believe that the God who created the universe is the same God who has revealed Himself in Scripture. Genuine discoveries about creation and faithful interpretation of Scripture therefore cannot ultimately contradict one another.

Our Foundation

Our ultimate foundation is the Word of God. Scripture is God's self-revelation. Science investigates God's creation. Mathematics studies patterns and order within creation. AKI seeks truth with humility before God, neither subordinating Scripture to science nor dismissing sound scientific investigation.

Our Mission

We believe the LORD has called us to explore how contemporary science and the Word of God may be understood together in faithful harmony, always remaining willing to be corrected by God's truth. We distinguish biblical text, theological interpretation, scientific investigation, philosophical reflection, and mathematical theory.

Our Theological Commitment

AKI does not seek to replace historic Christianity. We seek what we believe to be the most faithful interpretation of the biblical Scriptures through careful study, prayer, dependence upon the Holy Spirit, and humility before God. Our interpretations remain open to correction as our understanding grows in faithfulness to God's truth.

Creation and Intrinsic Order

Within AKI Theology, the enduring order discovered in creation reflects the eternal wisdom and faithfulness of God. Intrinsic Order is not an independent reality alongside God but an expression of the order by which the Creator faithfully sustains creation. Creation is understood as the progressive manifestation of an order eternally perfect in God.

Faith Seeking Understanding

Christian faith does not fear honest investigation. Because God is the Creator of both Scripture and creation, believers may study nature with confidence, humility, and

reverence. 'Great are the works of the LORD, studied by all who delight in them.' (Psalm 111:2)

Humility Before Mystery

Where Scripture speaks clearly, we seek to listen faithfully. Where scientific evidence is well established, we seek to understand it carefully. Where uncertainty remains, we prefer patience over speculation and humility over certainty.

Christ at the Center

The ultimate purpose of every mathematical investigation, scientific discovery, theological reflection, and act of worship is not merely greater knowledge but deeper love for the LORD our God through Jesus Christ.

Our Hope

We pray that the LORD will continually correct our errors, deepen our understanding, and keep us faithful to His truth. If our work contributes in any measure toward a clearer understanding of God's creation, a more faithful reading of Scripture, and a deeper love for Christ, then all glory belongs to God alone.

Soli Deo Gloria.
